

Rail Terminal Services

DB Schenker Rail Ltd

Rail Terminal Services Ltd

Peter Cummings

Barking, March 10, 2014

We have a flexible approach to provide value added services for our customers

The portfolio of Rail Terminal Services (RTS)

- Competent people with a 'can do' attitude
- Recruitment services
- Specialized bespoke materials handling equipment
- Train shunting services
- Train and vehicle weighing and loading
- Rail wagon cleaning
- Road haulage management
- Inventory management
- Environmental permit management

We are a multi-skilled team with the ability to adapt to the services your require

The benefits of collaboration with our team

- Company compliance clear and defined processes
- Close partnership with the same goals
- Strong focus on customer services
- Control over the whole process
- Updates on a regular base
- In-depth operational knowledge
- Keeping income internal

By collecting, storing and removing spoil from Bow East, RTS provides an integrated solution for Cross Rail

RTS enables smooth rail operations

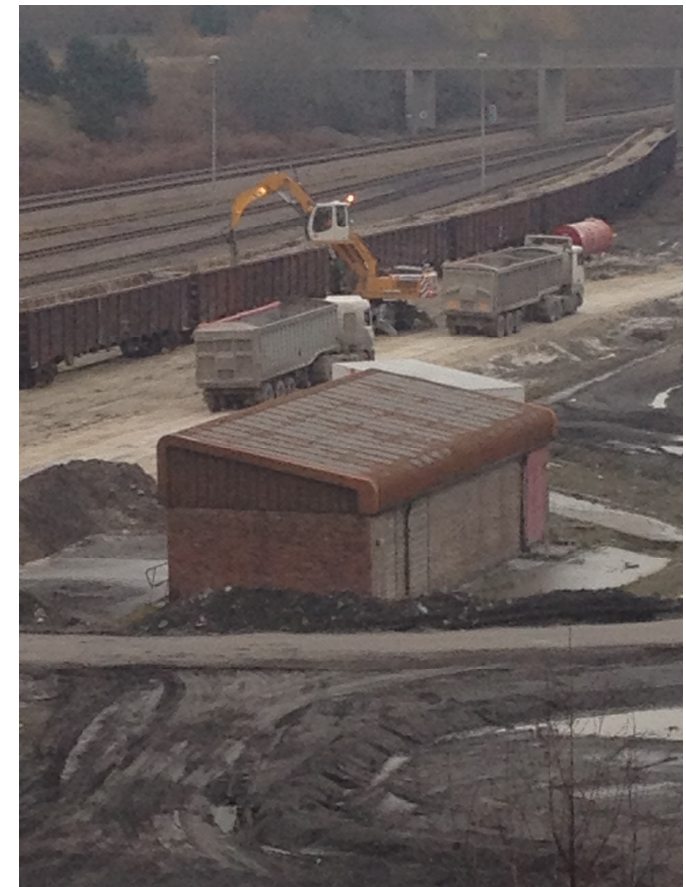

- RTS arranges transport to collect tunneled material from the Cross Rail operation
- 3000 tons of spoil per day are collected by four HGV vehicles (equivalent of 16 vehicles on turnaround on public road)
- The material is stored at Bow East Logistics Centre (up to 50,000 tons storage space)
- The material is loaded on to a train and rail haulage provided to designated delivery location (in Calvert)
- Weighing equipment used on loader machine and rail track to prevent overloading of rail wagons
- Uniform loading by RTS staff taking into consideration cleanliness of rail wagon, no spoil left on raves, material evenly loaded, weight distributed and safe for transit

In collaboration with DBSR, RTS provides bespoke equipment and people at Gascoigne Wood

RTS provides a value added service for DBSR

- Bespoke equipment for offloading gypsum from box wagons
- Recruitment and training of the right people to provide the service
- Improvement of the traffic management system enabling a cost saving to replace a 400 metre haul road
- Transportation management for the onward delivery of material to the client
- Development of a process to ensure wagons are offloaded to the maximum capacity to improve payload of rail wagon
- Continuous improvement together with our client on new ideas how material can be transported
- Keeps income within the DBSR group

London Gateway is a success story for Rail Terminal Services working in partnership with DP World

RTS fulfills all operational requirements

- Contract awarded by DP World to provide track maintenance and rail operations services
- Close collaboration with our colleagues within DBSR
- Company compliance training plan developed led by DBSR
- Recruitment and selection of the right people (railway experience was not a requirement)
- Competent and authorized team of rail terminal operators providing a customer focused service
- Every member of staff has clear responsibilities
